

Invertebrates

Materials:

- Scissors
- Brass paper fastener
- Cipher wheel (pages 2 and 3 of this worksheet)
- Invertebrates Cipher Code Fact Cards (pages 4 through 7 of this file)

Assembling the Cipher Wheel

Step 1: Print the cipher wheels on thick card stock.

Step 2: Carefully cut out the inner and outer wheel.

Step 3: Attach the inner wheel to the outer wheel, using a brass paper fastener.

Suggestions for Teachers

In order for the wheel to work correctly, the brass paper fastener must be pushed through the exact center of the wheel. Your students may need help with this step.

Have students save their cipher wheel for future activities. We have cipher code fact cards covering many topics on *SuperTeacherWorksheets.com*.

The entire activity does not need to be completed in one day. You may want to have students work on this activity for a short period of time each day until they've completed all of the fact cards.

Invertebrates

Invertebrates Fact #1

Invertebrates are animals that do not have a backbone.

Invertebrates Fact #2

Crustaceans are a group of invertebrates that includes lobsters, crabs, and shrimp.

Invertebrates Fact #3

Starfish are not really fish. They are invertebrates. They have no brain or blood. They eat clams, mussels, snails, and fish.

Invertebrates Fact #4

Spiders, scorpions, and ticks are arachnids. They have eight legs and two body segments.

Invertebrates Fact #5

One of the simplest invertebrates is the sea sponge. It spends its life attached to the ocean floor. It has no heart, brain, muscles, or mouth.
