

Name: _____

Measurement Project

With a tape measure or yard stick, measure the heights of five different people. You can measure parents, siblings, friends, or family members. You can even measure yourself.

Make a chart to show the heights, in order from tallest to shortest. Your chart should include:

- **Each person's name and a picture of each person's face. (Faces can be neatly drawn, or photographed.)**
- **Each person's height in inches, as well as feet and inches. (For example, you might list someone as 5'9" tall and 69" tall)**
- **Each person's signature, to verify that you have measured them carefully and accurately. (Everything else should be in your own handwriting.)**

At the top of your chart, list the tallest person. Below that, list the second tallest. Then, list the third tallest, and so on.

In class, you will be given a blank measuring table that you can use for this project.

Your measurement project is due on _____.

Measurement Project – Grading Sheet

- | | |
|-------------------|---|
| _____ (10 points) | The project has been brought to school on time. |
| _____ (15 points) | Chart includes the height measurements of five different people. |
| _____ (15 points) | Each person signed the chart to show that they were measured carefully and accurately. |
| _____ (15 points) | Each person's height is written as feet and inches <u>and</u> just inches. All conversions are correct. |
| _____ (15 points) | The heights have been arranged from tallest to shortest. |
| _____ (15 points) | Each person's face is drawn or photographed. |
| _____ (15 points) | Handwriting is neat.
Pictures are neatly drawn or photographed.
Paper is returned relatively wrinkle-free.
Each person's name is spelled correctly and begins with a capital letter. |

Total - _____ (out of 100 points)
