

To the Moon

Multiplication Board Game

Materials:

- game board (pages 2-3)
- multiplication question cards (pages 4-7)
- 6-sided die
- markers (any small object)

Preparation Tips:

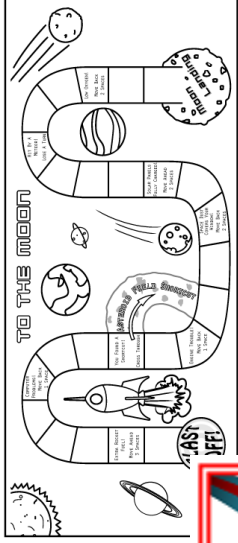

- Print the question cards on cardstock.
- Instead of printing the game question cards, use flashcards instead.

How to Play:

Begin by setting the markers on the board. Each player rolls the die to determine their starting square. The player with the highest number is Player 1. Player 1 rolls the die and moves forward the number of squares indicated. Player 2 takes a question card and asks the question. If Player 1 is correct, they move forward one square. If Player 1 is incorrect, they must go back to the square they started on. Then it is Player 2's turn to roll the die and move. Continue taking turns until one player reaches the moon and correctly answers the question.

Remember:

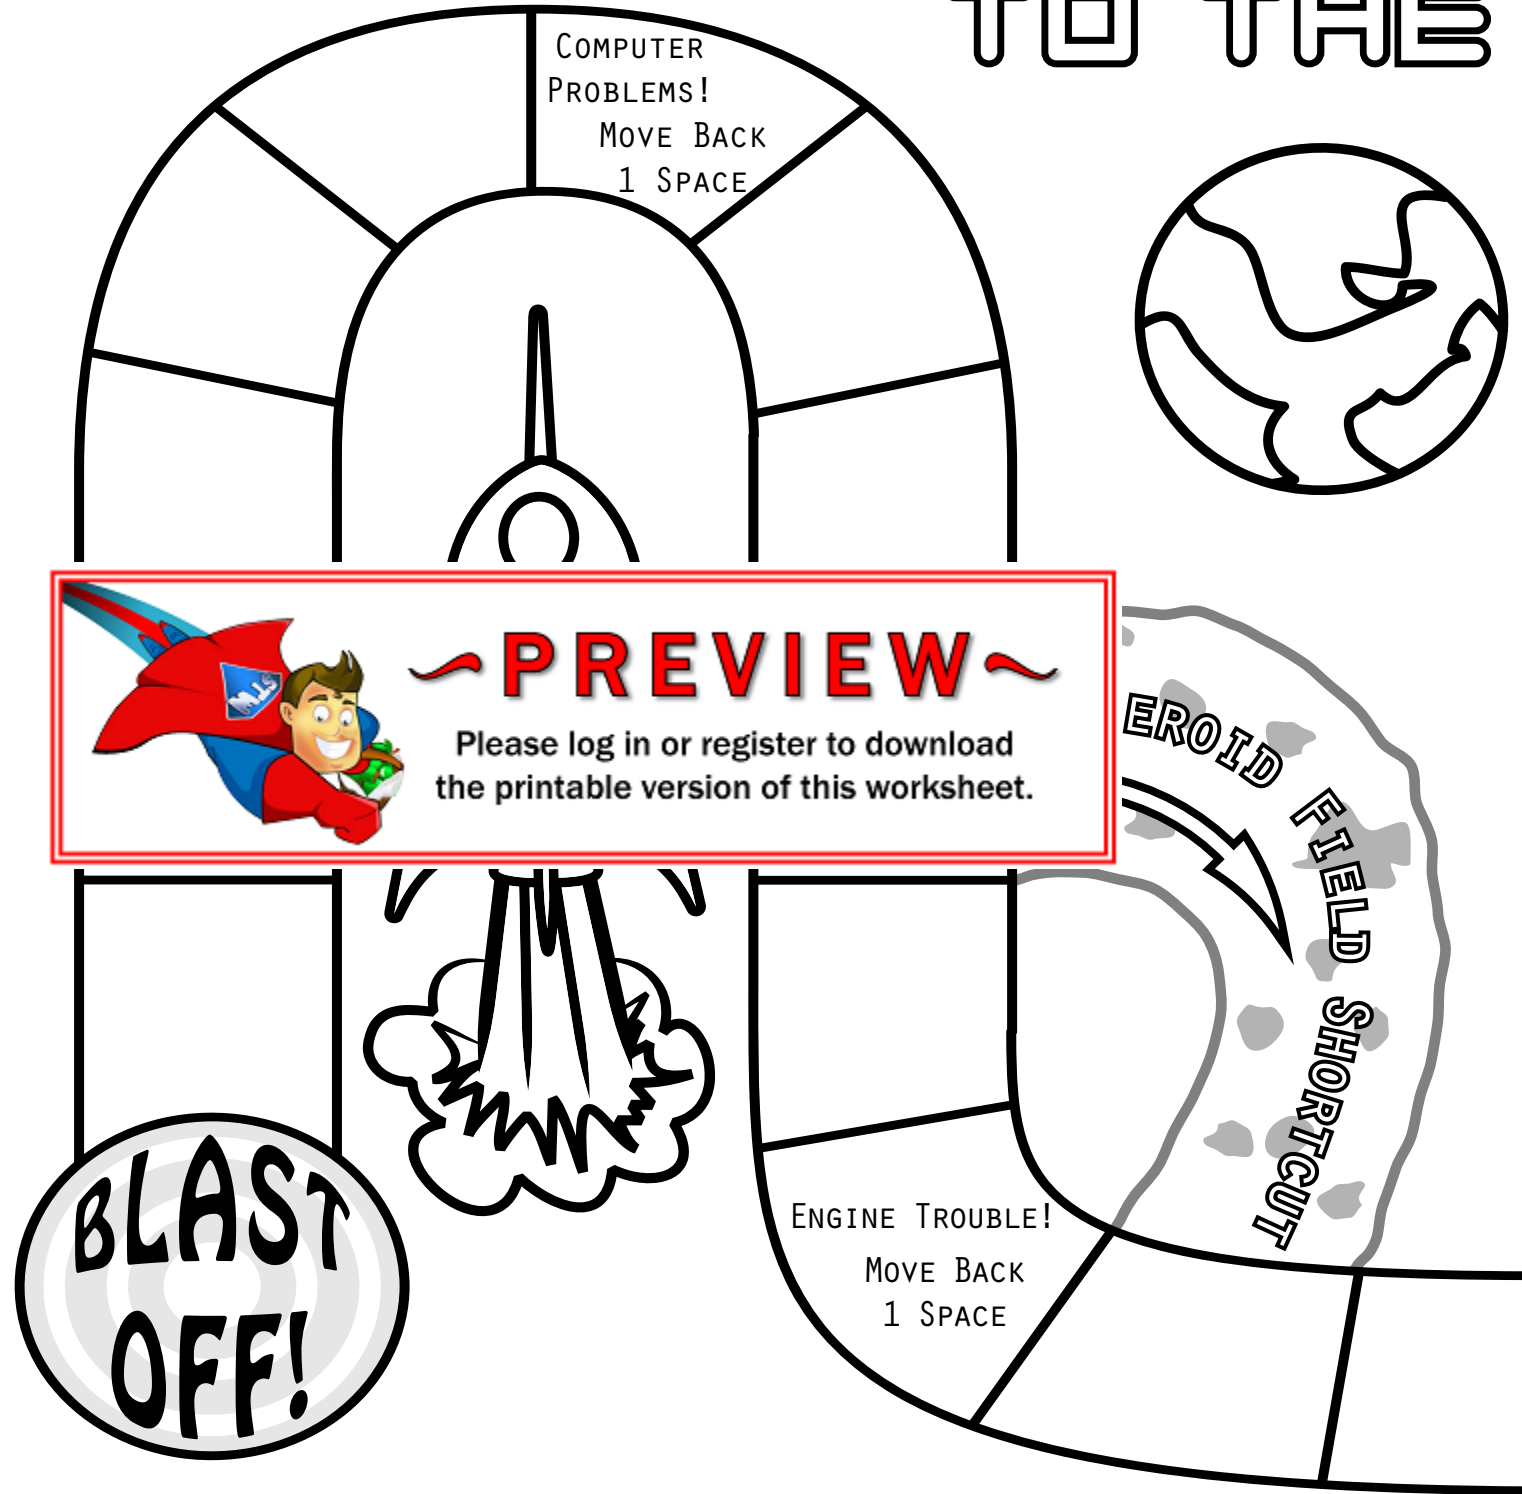

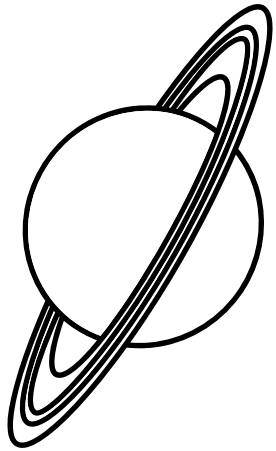

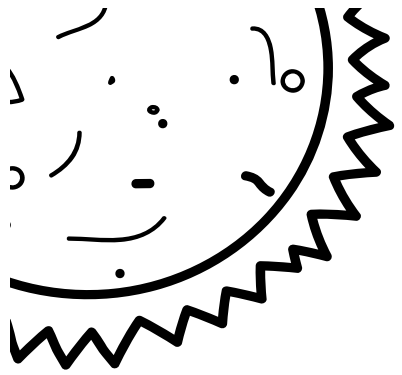

A player can only cross the asterisk square once. If they land on the square that says, "You found a shortcut!" they skip their next turn. If a player lands on "Lose a turn," they skip their next turn.
