

Name: _____

Jane Goodall

Have you ever dreamed of living with and learning from wild animals? A little girl named Valerie Jane Morris-Goodall had that dream, and it came true! That little girl grew up to become better known as Jane Goodall. She is now famous for her research on chimpanzees.

When Jane was 26 years old, she traveled from England to Gombe Stream National Park in Tanzania. She set up a camp out in the wild. She observed chimpanzees in the wild. She watched the chimpanzees for many months. Finally, Jane earned the chimpanzees' trust. An older chimpanzee was the first one to show that he trusted Jane. Jane named him David Greybeard.

Goodall made many new discoveries about chimpanzees. She discovered that they
