Name: _____

Layers of Earth Project

Step 1: Coloring

- a. Color the cover (picture of the Earth) and write your name on it.
- b. Color the crust brown to represent the Earth's land.
(Do not color the center of the circle below the crust.)
- c. Color the three layers of the mantle. Color the layers orange and red because it is made of hot, molten rock. (Do not color the center of the circle below the mantle.)
- d. Color the outer core light gray because it is made of liquid iron and nickel.
(Do not color the center of the circle below the outer core.)

Step 4: Staple

When your glue has dried, lay the cover page over the layers of the Earth page, and add a staple to the left-hand side.
