d.		Josh baked 42 cupcakes. His friends ate 9. How many cupcakes does he have left?	33 cupcakes

QR Subtraction

Important Notes for Teachers

What is a QR code?

QR stands for Quick Response Code. It is a digital bar code that can be read by most smartphones, tablets, and other computer scanners.

Technology Requirements:

This subtraction lesson requires students to use a QR reader app. They are available for free on most tablets and smartphones, including Android, iPhone, and iPad.

When students scan the codes with their QR app, word problems will be shown.

Some apps may try to display the answer with a web browser. If this is the case, go to the settings or preferences and choose view in "plain text."

Online Safety:

Students are not directed to websites to view the word problems.

Please be aware that some free apps may contain advertisements.

Adult supervision is recommended whenever students use an Internet-enabled device.

Management Suggestion:

If students struggle to find the QR code with the device's camera, you may want to have them use scrap paper to cover all QR codes except the one they are using.
